

Making art for My Skoobi Notebooks is easy. Here's how!

Draw or paint anything you want. When you make your art, think about what part will be on the front cover and back cover of your notebook:

Don't put any important details near the edges

Leave space for the logo and your book number.

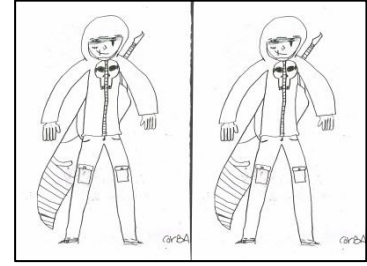

Here are some real drawings, to show the easiest ways to make a cover:

1 In this example, one drawing wraps across the whole notebook. Turn one sheet of paper sideways: the right side of the paper will be the front of your book, and the left side will be the back.

2 In this example, there is a different drawing for the back cover and the front cover. You can use two sheets of paper and make two drawings, or one sheet turned sideways.

3 In this example, the same drawing is used twice: once on the front, once on the back. Use one piece of paper, and make just one drawing.
